@Daddyphatsnaps

One of the reasons I focus on watch time so closely is I feel it is the closest you will get to the absolute truth from your audience. Time is our most valuable commodity and if people choose to listen to a song all the way through and potentially again it tells me they found what I did to be valuable.

This has also molded my philosophy on how I make music.

I always want songs to feel like a journey and sometimes that journey goes down roads that don't parallel the original path.

The one thing I never want is my music to feel formulaic. There is a reason for everything that happens in one of my songs. And while formulas are tried and true and have proven incredibly successful, I have never been that kind of artist.

Watch time reinforces that people don't want that either (at least from my audience) which is why I will ditch structural constructs from time to time and do what I feel to be interesting and fresh.

I will never make the music you want to hear, I will always make the music I find to be interesting in hopes you will find it to be interesting as well. I will always be me and I love my audience who allow me to do just that. Hope you are having and amazing weekend.

**Struggling to Find Your Sound? Watch this...**

davros303 · 23 hours ago

This is exactly what I did in order to start finishing tracks, to find a sound, and to finally get material released. I immersed myself in one genre (and yes, that sometimes gets boring, but I knew I was engaged in a research and learning process, not simply to listen for pleasure), listened to a lot of tracks, studied the production techniques of that style, watched the tutorials of the best producers I could find in that style, and slowly it all came together. Great advice Mr. Ed.

Tickling While Getting a HJ

After teasing Diviyne and her new friend I am really turned on and want to cum. We move to the bed where Diviyne strokes my cock while I tickle Fawna along her body and feet. I won't stop tickling her until Diviyne strokes me to orgasm. The combination of the two is extremely hot and I was hoping to last longer, but with these two sexy goddesses how can you?

Secret Fire
Legendary Creature — Avatar Wizard
Whenever you cast an instant or sorcery spell from your hand during an opponent's turn, exile that card with three time counters on it instead of putting it into your graveyard as it resolves. Then if the exiled card doesn't have suspend, it gains suspend. (At the beginning of your upkeep, remove a time counter from that card. When the last is removed, play it without paying its mana cost.)

Your work blows me away, I'm always listening to the sonic elements, inspiration, mix and arrangement.

I love how different your tracks are from each other and that in turn inspires me.

Thank you for sharing your process as well!

Concept Artist

Hello m[illegible] name is Andrea Cofrancesco.

I grew u[illegible] the 90's and my first love for art
started with the 16-bit era,
the early fighting games,
the epic Filmation's cartoons and all those
colorful old school anime like [illegible]ange Road.

After graduation in acoustic physics
and electronic music at the
University of Music in Rome
and a short yet intense music studio career,
I decided to follow my real passion for visual arts.

Today I work in the game industry
as a professional concept artist,
character designer, and illustrator.

During this class, you will learn
how to gather inspiration from any kind of reference
and use it in a creative way to your advantage,
to build solid character designs
in a non-ordinary anime style.

You will learn, step-by-step,
the main features of character development,

Class Highlights

## Being Creative

It doesn't take special tools and mediums to create a unique and original piece. In character design, the creative approach is the real key to creating an attractive original character. Learn to bring together references in the most creative way possible to step up your game.

## Building Dynamic Characters

The awkward face and rigid posture doesn't give your character the best look. We will go over my approach to altered anatomy and facial expression to create more dynamic characters.

and facial expression to create more dynamic characters.

## Adding Complexity to Your Design

What is the difference between a flat illustration, and a complex illustration? Learn to add backgrounds, props and more characters to your illustration to create a more interesting and complex design.

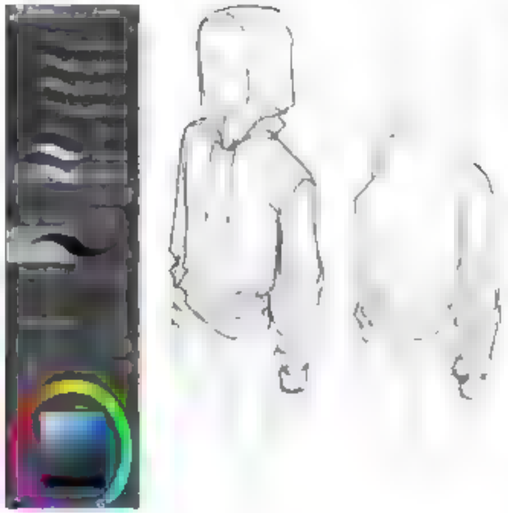
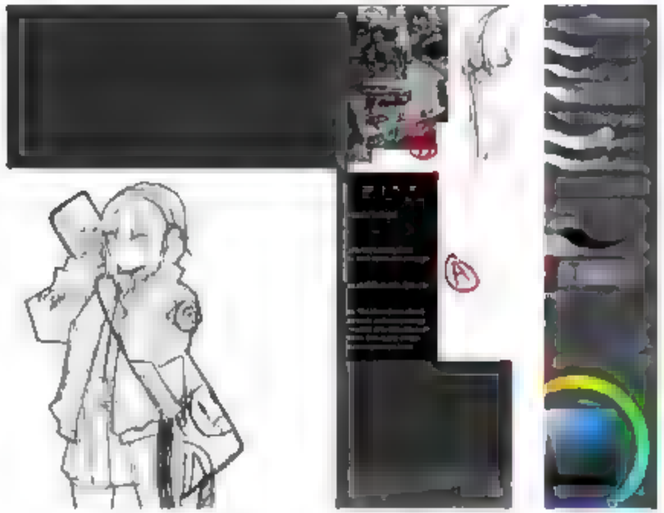
# You'll Learn



### Designing Your Character

The first step of creating an original character involves brainstorming a unique concept. We'll learn how to find references, select color palettes, and determine the character's physical appearance. Once we have a general idea, we'll start from sketching rough concepts for your character. Design the character's overall look by drawing the character's body type and facial features.



### Drawing Your Character

You'll learn how to sketch your character in detail and refine proportions and features. We'll add clean lines to your sketch, which will help define the character's shape and make it easier to color. Lastly, we'll render the character, which means shading and texturing to create depth and dimension.

### Creating Facial Expressions

Learn how to bring the character to life with facial expressions. Facial expressions convey the character's personality and emotions. We'll learn to draw various eye, nose, and mouth shapes, and combine these parts to create different expressions.

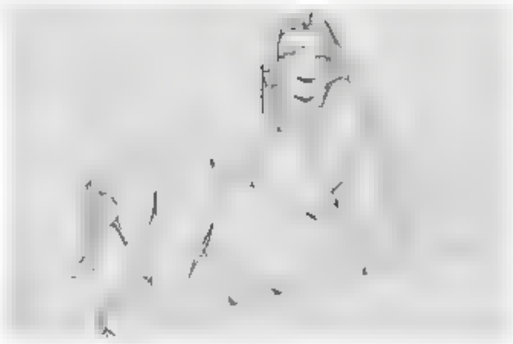
However, there's more to it than just getting the anatomy right. You'll learn how to direct the gaze of your characters, even in the most exaggerated poses



**Composition**

To bring characters to life, sometimes we need to give them something a little extra - like objects! It's also important to consider how these objects look on characters in action. I'll show you how to apply what we've learned about character movement to action in a scene

blowingfact The cost of buying a house in the U.S. has increased much faster than the income of most families over the past six decades.

In 1960, a typical family earned about half of what a house cost, but in 2023, a house costs about six times more than what a family earns. This means that owning a home has become much harder and less affordable for many Americans.

A man browses for books in the old Public Library of Cincinnati. The building was demolished in 1955. Today, an office building and a parking lot stand where it used to be.

The Old Cincinnati Library was built in 1874 on the site reserved for an opera house. With five levels of cast iron shelving, a fabulous foyer, checkerboard marble floors, and an atrium lit by a skylight ceiling, the place was considered a great architectural work. The cost of the lot and building was $383,594.53, about $7.7 million today. The Public Library contained 60,000 volumes, with an estimated capacity of 300,000.

The reasons why the building was demolished were poor ventilation, stuffy air, peeling paint, and at a certain point, the book collection had started to outgrow the building, and books were stacked beyond reach.
